## SUMMARY

Information Security Analyst with 3+ years of combined experience in cybersecurity, network operations, and infrastructure support. Skilled in security monitoring, incident investigation, endpoint security and network security controls. Experienced in using enterprise security solutions. Strong background in network engineering, routing, switching, firewall concepts, and global IT operations.

**Certification:** CompTIA Security+ | Cisco Certified Network Associate (CCNA)

**Training:** GuideM Cyber Defense & Threat Hunting Bootcamp - Training Completed; certification exam pending schedule

**TryHackMe Security Engineer Learning Path | CrowdStrike | Armis Centrix | Netskope | Varonis**

## TECHNICAL SKILLS

- **Security Platforms:** CrowdStrike Falcon, Bitdefender GravityZone, Armis Centrix, Netskope, Varonis, Halcyon Anti-Ransomware
- **SOC / EDR Investigation:** Alert triage, incident response lifecycle, malware investigation, defense evasion, LOTL activity, IOC validation, endpoint investigation,
- **Scripting / Querying:** PowerShell fundamentals, CrowdStrike CQL basics, RTR exposure, Bash basics
- **Network:** Cisco, Juniper, Arista, FortiGate, VLAN, ACL, BGP, OSPF, EIGRP, MPLS, L2VPN
- **Other Tools:** CTI Tools and Sandbox, Zabbix, SolarWinds, ServiceDesk, Jira, Microsoft Intune

## WORKING EXPERIENCE HIGHLIGHTS

**Information Security Analyst-Allegro Microsystems Philippines Inc (March 2025-present).**

- Execute the incident response lifecycle, including playbook creation and updates, alert identification, investigation, containment, eradication, recovery validation, documentation, and lessons learned.
- Monitor, triage, and investigate security alerts across endpoint, phishing, user behavior, network, data security, and anti-ransomware platforms using CrowdStrike Falcon, Bitdefender GravityZone EDR, Armis, Varonis, Netskope, and Halcyon Anti-Ransomware.
- Investigate security incidents involving malware, ransomware, defense evasion, Living-off-the-Land activity, abnormal user behavior, AI-related policy alerts, and cybersecurity policy violations.
- Perform endpoint investigation and alert validation by reviewing file hashes, digital certificates, suspicious processes, command-line activity, host context, user activity, and related security telemetry.

- Investigate acceptable use policy violations and risky user behavior; document findings and coordinate with HR, IT, and relevant stakeholders for awareness, escalation, and corrective action.
- Create and maintain dashboards to monitor suspicious, malicious, unmanaged, and high-risk asset activity, improving visibility for investigations and response prioritization.
- Support security operations projects, including backup enforcement, scheduled manual scanning for legacy systems, MDM initiatives, DNS allowlist/blocklist maintenance, approved security tool exclusions, and minor security policy adjustments.

### Key Achievements

- **Improved alert handling consistency** by supporting the development of incident response playbooks for security investigations, escalation steps, and mitigation workflows.
- **Assisted in securing production VLAN migration** by validating segmentation, access controls, and policy compliance with infrastructure and network teams.
- **Strengthened investigation quality** by consistently documenting alert context, affected users or hosts, evidence collected, and recommended response actions.

### Network Operations Center (NOC) Engineer Associate- Total Information Management Inc.(July 2023 – March 2025)

- Monitor network performance and health using Zabbix, SolarWinds, Ping, and Traceroute; identify and resolve connectivity issues.
- Administer network changes and configuration control for Cisco, Arista, Huawei, and Juniper devices.
- Document network incidents, perform root cause analysis, and generate reports.
- Collaborate with SOC teams to enforce network security, including malicious IP blocking and port security.

### Key Achievements

- **Contributed to network security hardening** by participating in implementation of port security and compliance measures.
- **Supported switch PoC testing and integration**, ensuring proper configuration and performance validation.
- **Assisted in network traffic simulations**, helping optimize bandwidth allocation and improve infrastructure performance.

### Career Transition *(September 2022-July 2023)*

- Completed CCNA certification as part of a career transition and gained hands-on experience through practical labs and coursework while enrolled in Mnet Solutions for self-paced training.

### Other Professional Experience Nagatsu Sanpla & Atlantic Grains Inc. – Purchasing / Administrative Roles *(Aug 2019 – Sept 2022)*

- Managed vendor coordination, procurement processes, timely delivery tracking, audit support, and compliance documentation to improve operational efficiency.

## EDUCATION

- Bachelor of Science in Information Technology, Polytechnic University of the Philippines, Santa Rosa Laguna, Philippines
